

Tahitanga Health Centre

(Synergistic Healthcare for our Community)

Support a Community-Owned Health Project

“Our health is our wealth”

Why this project is important to all of our local community?

Clinical diagnostics services are under significant pressure, and meaningful change will only happen when communities, healthcare providers, and partners come together with a shared vision for better care. Tahitanga Health Centre Group is committed to expanding our community's Clinical Pathology Sector, founded in integrative health support and community conscious health foundations. **We are focused on strengthening access to healthcare for future generations,** building lasting community health resources, and creating pathways for education and wellbeing.

Our cornerstone vision is grounded in being a place for the community, by the community. We recognize that diagnostics are only one part of the healthcare journey, and that timely access to care, support, and follow-up services before, during, and after diagnosis is equally important.

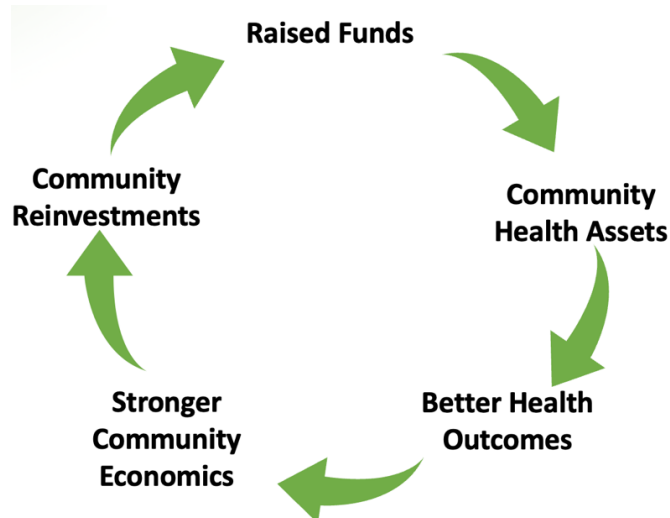

The Tahitanga Team has developed a collaborative and inclusive model of care that brings together clinical services with improved scope and efficiency of current, available testing and integrative health approaches to support more targeted, personalized, compassionate healthcare outcomes. This critical addition to our community will exponentially improve health outcomes by reducing delays and allowing vital access to testing not currently available in our region.

Understanding the needs of Clinical Pathology within our community is a driving force for change. As a not-for-profit organization, our company constitution ensures that all profits are reinvested directly back into the community with a sustainable model of reinvestment, helping strengthen local health initiatives and future opportunities.

Together, we have an opportunity to invest in a healthier future through innovative, connected, and community-led healthcare.

If you would like to read more about our current community diagnostics and integrative care, please visit our website.

Our Opportunity for the Future

Our region has been presented with a valuable and rare opportunity to purchase a multi-purpose community health and medical property—anchored in connection with Tahitanga Health Centre. The construction of the Clinical Laboratory and ownership of the healthcare property extends our current community outreach and health support. We have secured the first \$10 million with the immediate asset acquisition with property purchase. We are reaching out to the community to support us, and in return support all of us!

We have secured an opportunity to purchase an established medical property with development opportunity to build out a Clinical Pathology Lab directly within the same local of a local/private hospital. The community ownership allows us to build the very first in New Zealand a **not-for-profit Clinical Pathology Laboratory**—a critical addition that will improve access to timely diagnostics and reinvest straight to the heart of community wellbeing, supporting better care, all closer to home.

This vision brings together both integrative and allopathic healthcare providers into a coordinated, collaborative environment, enhancing the very foundations of community health. Many of these providers are already established within the existing centre, and by working together more closely, we will create a truly connected model of care that supports a healthcare system currently under significant pressure.

We are now working to raise the remaining funding needed to make this vision a reality for everyone in our local community. If this project has inspired you, informed your work, expanded your thinking, or helped you in any way, we're asking for a simple **\$1 contribution**.

Why \$1?

Because this isn't about the amount — it's about **demonstrating community support** and real-world impact. Every contribution helps show funders, collaborators, and partner organizations that this work has reached people and created value.

A large number of small contributions tells an important story: people care, people are engaged, and this project matters.

If the project has meant something to you, please add your \$1 and share this with others who have been part of the journey.

Be Part of the Future of Health

We invite you to take part in something truly transformational.

This is New Zealand's first not-for-profit clinical pathology laboratory of its kind—an initiative that addresses real gaps in access to diagnostic services while strengthening local healthcare delivery and support. We have so many amazing community members participating in this project. Please join us!

You can support this project by:

- Contributing financially
- Offering professional skills or services
- Sharing this vision within your networks

Every action brings us closer.

Together, we can create a healthcare hub that **sets a new standard for community-led care**.

Get Involved as a Volunteer

This is a community-led project, and volunteers are at the heart of its success. By offering your time and energy, you can help build momentum and bring this vision to life.

Volunteer roles may include:

- Assisting with community engagement and awareness events
- Organising community-led initiatives to support the project
- Supporting communications and outreach (photography, social media, local promotion)
- Helping coordinate engagement across networks and organisations

There are opportunities for people with all kinds of skills—organisers, communicators, builders, healthcare professionals, and community champions alike.

Contribute as an Individual Supporter

Individual supporters play a vital role in bringing this project to life. Contributions go directly toward the purchase, development, and fit-out of the health centre, hospital services, and clinical laboratory.

You can give in a way that suits you—whether as a one-time donation or through regular contributions (weekly, monthly, or annually). Donations can be made online, via direct debit, or by invoice.

All eligible donations receive applicable tax benefits, and recognition opportunities are available for those who wish to be acknowledged for their support. We are also happy to keep your donation anonymous if you choose.

Every contribution—no matter the size—helps secure essential healthcare services for our region with support from those who will benefit the most, our community.

Become a Project Donor or Partner

Project Donors

Project Donors provide financial contributions directly toward securing the property portfolio and developing the health centre and clinical pathology laboratory.

Project Partners

Project Partners contribute goods, services, or expertise that support the delivery of the project—working alongside contractors and the wider project team.

Both forms of support are essential. They demonstrate a shared commitment to strengthening healthcare in our region and help accelerate progress toward our \$20 million goal.

We have already secured \$10 million. **This ultimately is paid through the current tenants of the building, adding no extra cost, but a huge investment into our community.** Our goal is to raise the remaining \$10 million from a multi-faceted fundraising strategy. Time is of the essence, however we have established a relationship with the current owners and look forward to seeing this project develop.

Support the Campaign Behind the Project

Campaign Donors

Campaign Donors help fund the operational side of the fundraising effort. This includes essential costs such as:

- Professional services (legal, planning, project coordination)
- Technology and systems
- Communications, marketing, and outreach

This support ensures the campaign is effective, transparent, and capable of reaching the wider community.

Partner With Us

Campaign Partners play a key role in expanding reach and driving engagement.

Value Partners

Provide goods or services of measurable value, such as:

- Printing and promotional materials
- Event support (venues, catering, logistics)
- Professional services

Engagement Partners

Help raise awareness and funds through their networks. This could include:

- Hosting fundraising events
- Running workplace given initiatives
- Encouraging staff, customers, or communities to contribute
- Promoting the project through existing channels

This is an opportunity to unite people around a shared purpose—improving the future of healthcare in our region.

Join the Community Giving Initiative

We invite individuals and organisations to take part in a regular giving movement—supporting the project through small, ongoing contributions.

By committing to a weekly donation, supporters collectively create a steady and reliable funding stream that helps sustain progress over time.

Organisations can support this initiative by:

- Encouraging staff participation
- Promoting the initiative through their networks
- Joining as contributors themselves

This approach reflects a shared belief: that lasting community wellbeing is built through consistent, collective effort.

“Nāu te rourou, nāku te rourou, ka ora ai te iwi”

“With your food basket and my food basket, the people will thrive”

Why This Matters

This project is about far more than buildings—it's about long-term impact.

- The facility will be owned by a community trust, ensuring it serves people—not profit
- It will bring together a wide network of healthcare providers working collaboratively
- A Clinical Pathology Laboratory will deliver essential diagnostic services locally and improve timely diagnostics and care pathways for Allopathic and Integrative Care
- All laboratory revenue will be reinvested into community healthcare
- The development includes capacity for future expansion as demand grows
- Over time, this will become a \$20–30 million community-owned health asset for the initial investment of \$10 million

This is a new model of care—community-led, integrated, and designed for long-term sustainability.

Frequently Asked Questions

How much of my donation goes directly to the project?

More than 95% of all funds raised go directly toward the purchase and development of the health facilities. Less than 5% supports essential planning and operational costs.

What if the funding goal is not reached?

If the purchase cannot be completed, donated funds will be returned to the community not-for-profit health sector, with a transparent process to determine next steps.

Are donations tax deductible?

Yes. Donations qualify for applicable tax credits, and official receipts will be provided.

This is our opportunity to take an active role in shaping the future of healthcare in Nelson Tasman.

Join us. Support your community. Help build something for our future generations.

Sincerely Committed,

The Tahitanga Team
